## What is this place?

**Evergreen Brick Works is a hub – a place where the world can experience sustainable ideas that enable flourishing cities of the future.**

In 2010, Evergreen transformed a collection of deteriorating heritage buildings into a global showcase for green design and an award-winning public space. Open year-round, Evergreen Brick Works welcomes more than 500,000 visitors annually to experience its public markets, participate in conferences and events, enjoy outdoor learning and nature play, and explore public art in the heart of Toronto's ravine system.

### A Unique Site. Rich in Possibility.

From 1889 to 1984, Don Valley Brick Works was one of Canada's pre-eminent brickyards. At its peak, more than 43 million bricks a year were manufactured for use in the construction of homes and buildings across Canada.

When the factory closed down in 1984, the site was abandoned, leaving behind a damaged ecosystem, crumbling buildings and contaminated soil.

Restored and revitalized by Evergreen, a national not-for-profit, the site is now home to a LEED Platinum building and is a global showcase for green design, urban sustainability and a vibrant public space. It was named one of the world's top 10 geotourism destinations by National Geographic.

## Who is Evergreen?

Since 1991, Evergreen, a not-for-profit, has provoked bold action in transforming public landscapes into thriving community spaces. We believe that connecting people, natural and built worlds create flourishing cities for the future. For more than 25 years Evergreen has connected, collaborated, and catalyzed Canadians to do amazing things positively affecting attitudes and behaviours that lie at the core of a sustainable city.
